We use emerging technology to secure **Digital Experiences** and drive **Business Growth**

BRITGE extends the opportunity to collaborate across the entire spectrum of services offered by **ITG Holding**, a collaboration of **17 companies** all anchored in a 50-years heritage of collective expertise and excellence

Creating world-class teams to design world-class products

We **partner** with some of the world's tier-1 brands

We lead the way in innovating the **digital customer experiences**, with expertise in designing, creating, and deploying advanced digital solutions for aspirational global brands

We excel in engineering bespoke Android, iOS, and Windows mobile applications tailored to meet your specific business needs

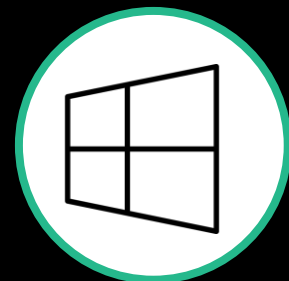

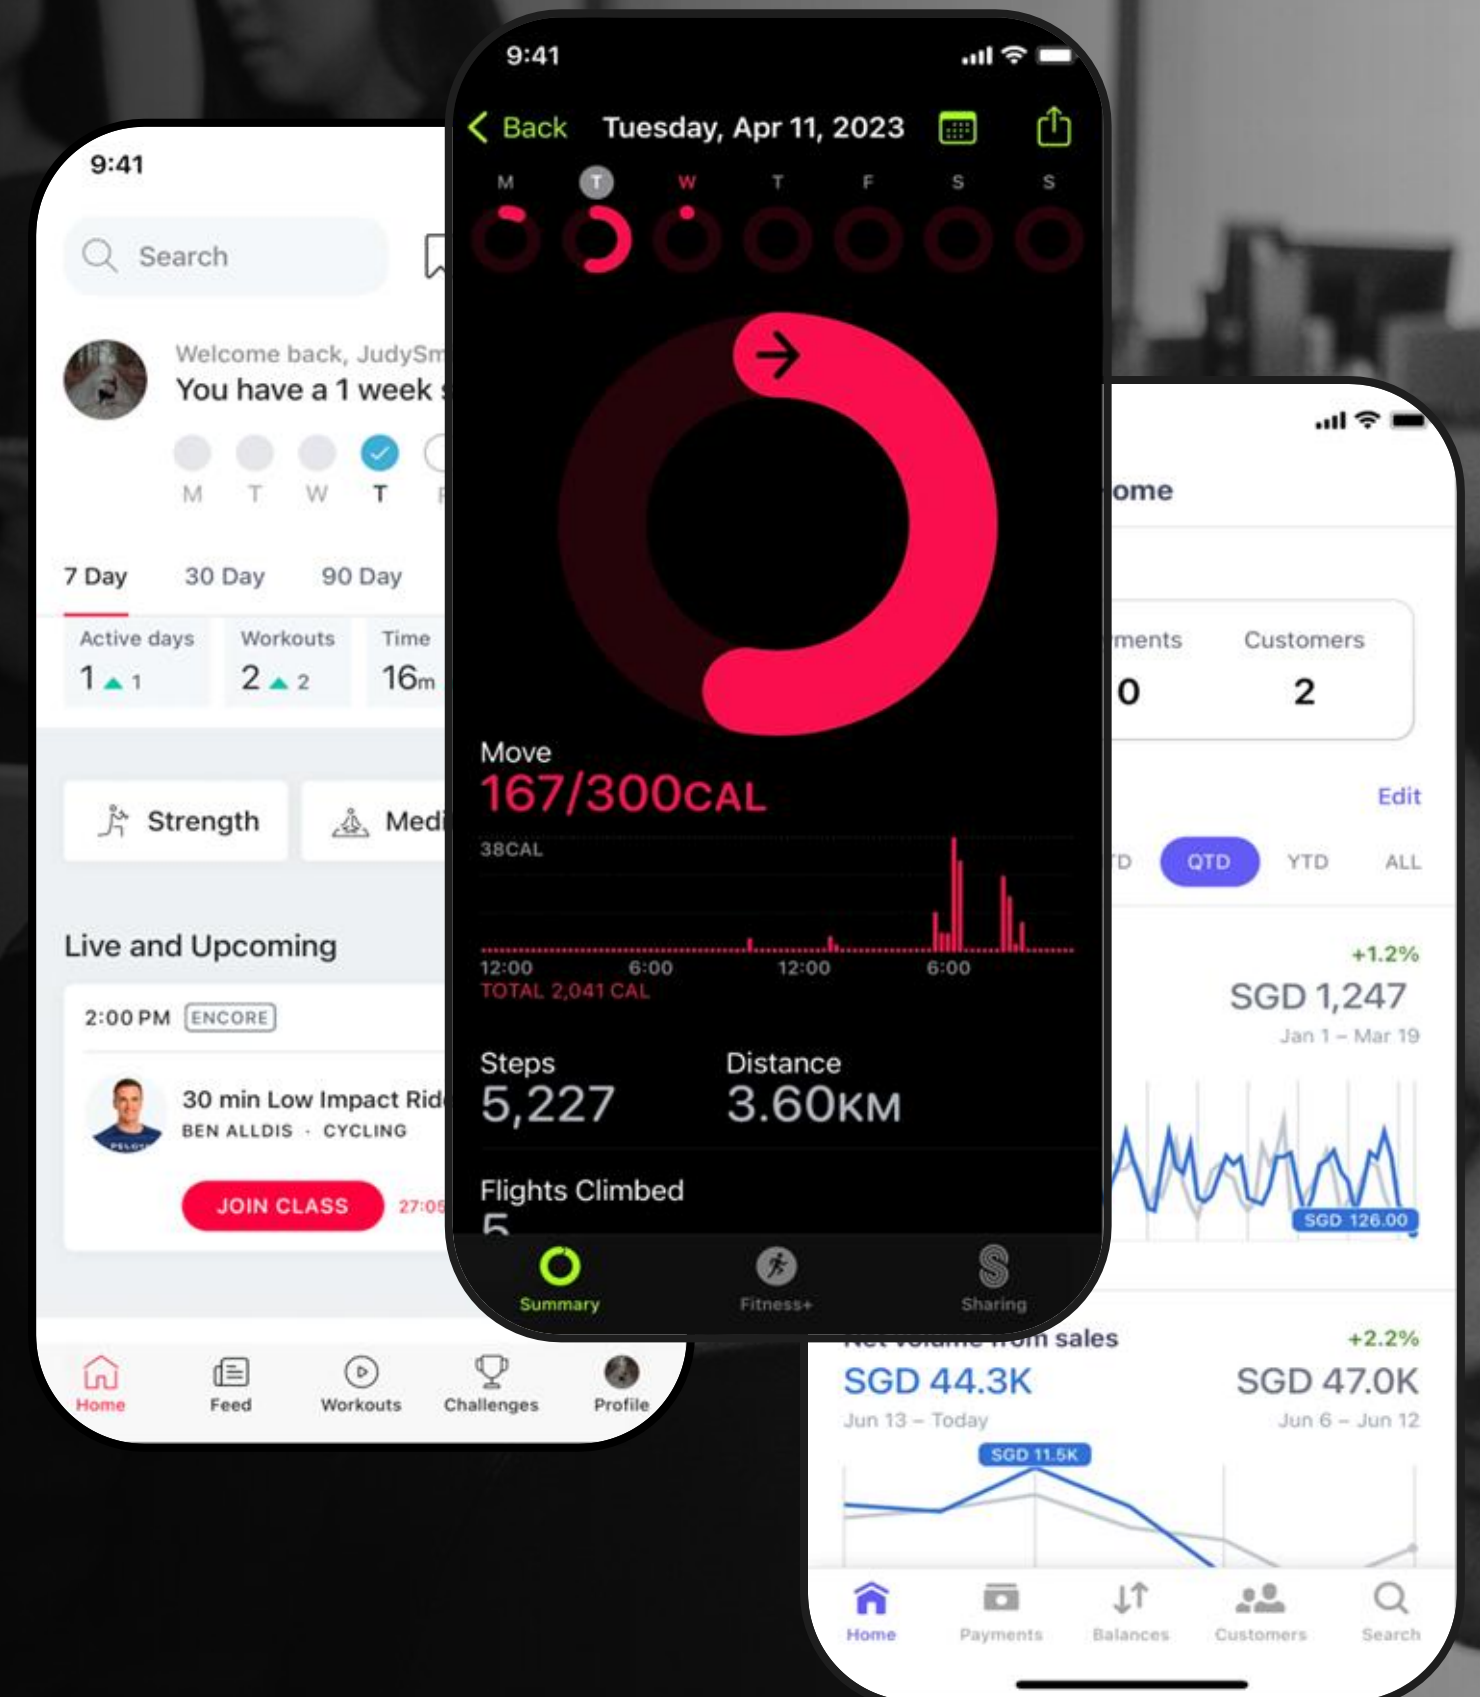

Empowering businesses to differentiate themselves and achieve their objectives through iOS development tools

Expand your customer reach on widely-used Android mobile devices with Chetu's comprehensive Android mobile app development services, covering integration, implementation, and ongoing support

Specialized in engineering mobile applications, including Windows-based IoT consumer and industrial mobile apps, harnessing the capabilities of Microsoft technology

MOBILE APPLICATION PLATFORMS

Our mobile app developers specialize in crafting cross-platform, native, and hybrid applications, employing industry best practices and cutting-edge tools to ensure optimal performance and user experience

Cross-Platform Mobile Apps

Crafting custom-tailored cross-platform mobile apps infused with bespoke features and functions, meticulously designed to enhance the user experience.

Native Mobile Apps

Specialized in creating high-performance, secure, and user-friendly native mobile applications, aiming to deliver an unparalleled user experience. Our solutions are tailored to enhance conversion rates and foster customer loyalty for businesses

Hybrid Mobile Apps

Hybrid mobile apps development leveraging the Apache Cordova framework, utilizing JavaScript, HTML, and CSS. Our solutions enable businesses to expand their customer reach across all mobile devices

technology management

Skilled Team

Highly experienced,
consultants who receive
continuous investment

Partner Certified

Qualified consultants

Our distinctive **Agile Process Framework** is built on the principle that methodologies should be **customized** for every client. We adapt the process to align seamlessly with the established work methods

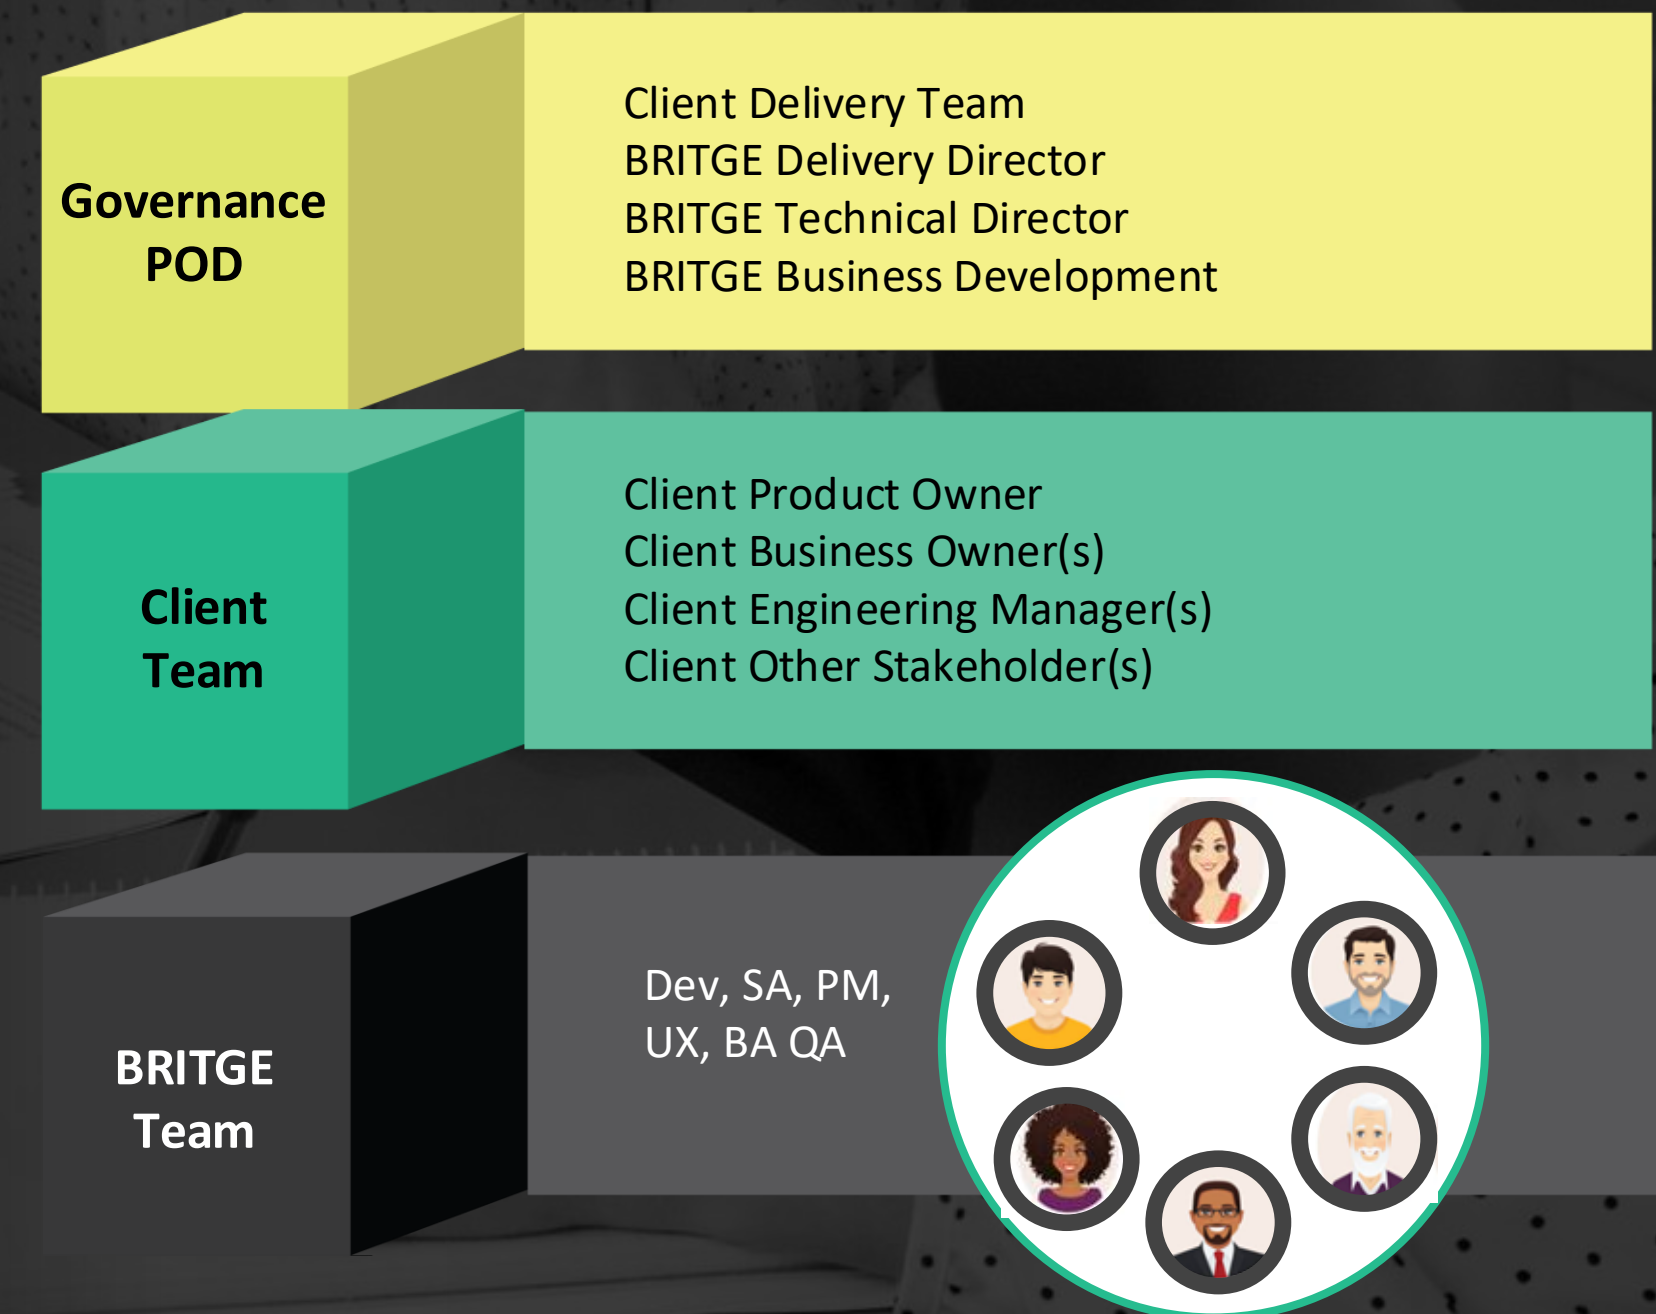

Agile Team with Blended Skills:

- Comprising more than three skilled individuals
- Self-organized to achieve strategic, creative, or production goals
- Drives excellence and growth while mitigating risks
- Assumes full responsibility for end-to-end delivery

From Agile PODs to Feature Teams

- Establishes an organic ecosystem fostering effective delivery and innovation
- Empowers teams to create, maintain, and evolve solutions, build features, products, or platforms
- Equipped with a core Lean/Agile mindset and associated competencies
- Measurement-driven evolution based on engagement goals

The Governance Pod oversees the development of the Delivery Program responsible for executing various projects. Additionally, it creates the business environment and framework within which all Pods operate. Strategic direction, technical leadership, and oversight are provided to facilitate mid and long-term planning, ensuring collaboration and knowledge sharing across all development Pods

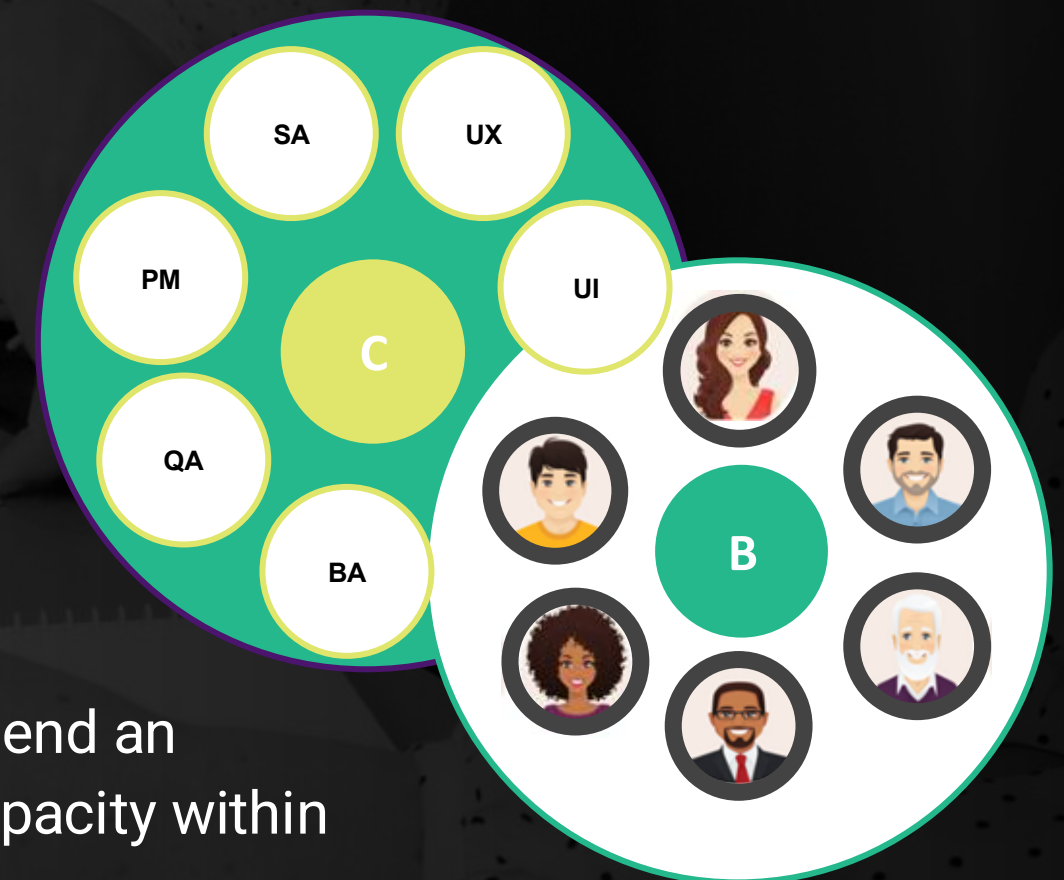

Our delivery models exhibit **flexibility**, seamlessly adapting to provide **optimal service** to our clients

END TO END PROJECTS

- POD is autonomous and fully responsible for the delivery
- It can build and sustain features, products or platforms
- Self-organized to meet creative and production goals
- Blended with skills and seniority: management, engineering, design, quality roles, etc..

EXTENDED TEAM CAPACITY

- POD is set to extend an existing team capacity within a project or program
- Organized to follow Client development process
- Roles within the POD can complement or extend Client' team
- Management can be unified or distributed

Some of our clients in a 50+ years journey

Thank You!
