REGIONAL PRESENCE

OUR AFFILIATES IN EGYPT

The times we live in / The advent of the Digital Transformation

Within a short span of time, our homes, offices and lives have been transformed by the greatest data revolution the world has ever witnessed

But changing times come with their own set of challenges and keeping up with them requires a wide range of solutions provided in real time

Our Vision

To be the Oxygen for our customers in their journey towards an agile and digitized world

Our Mission

In a fast changing & disruptive world, our aim is to provide our customers with Managed or On Premises IT & Security Solutions alleviating them from the operational challenges in their transformation to the "Digitized Enterprises of the Future"

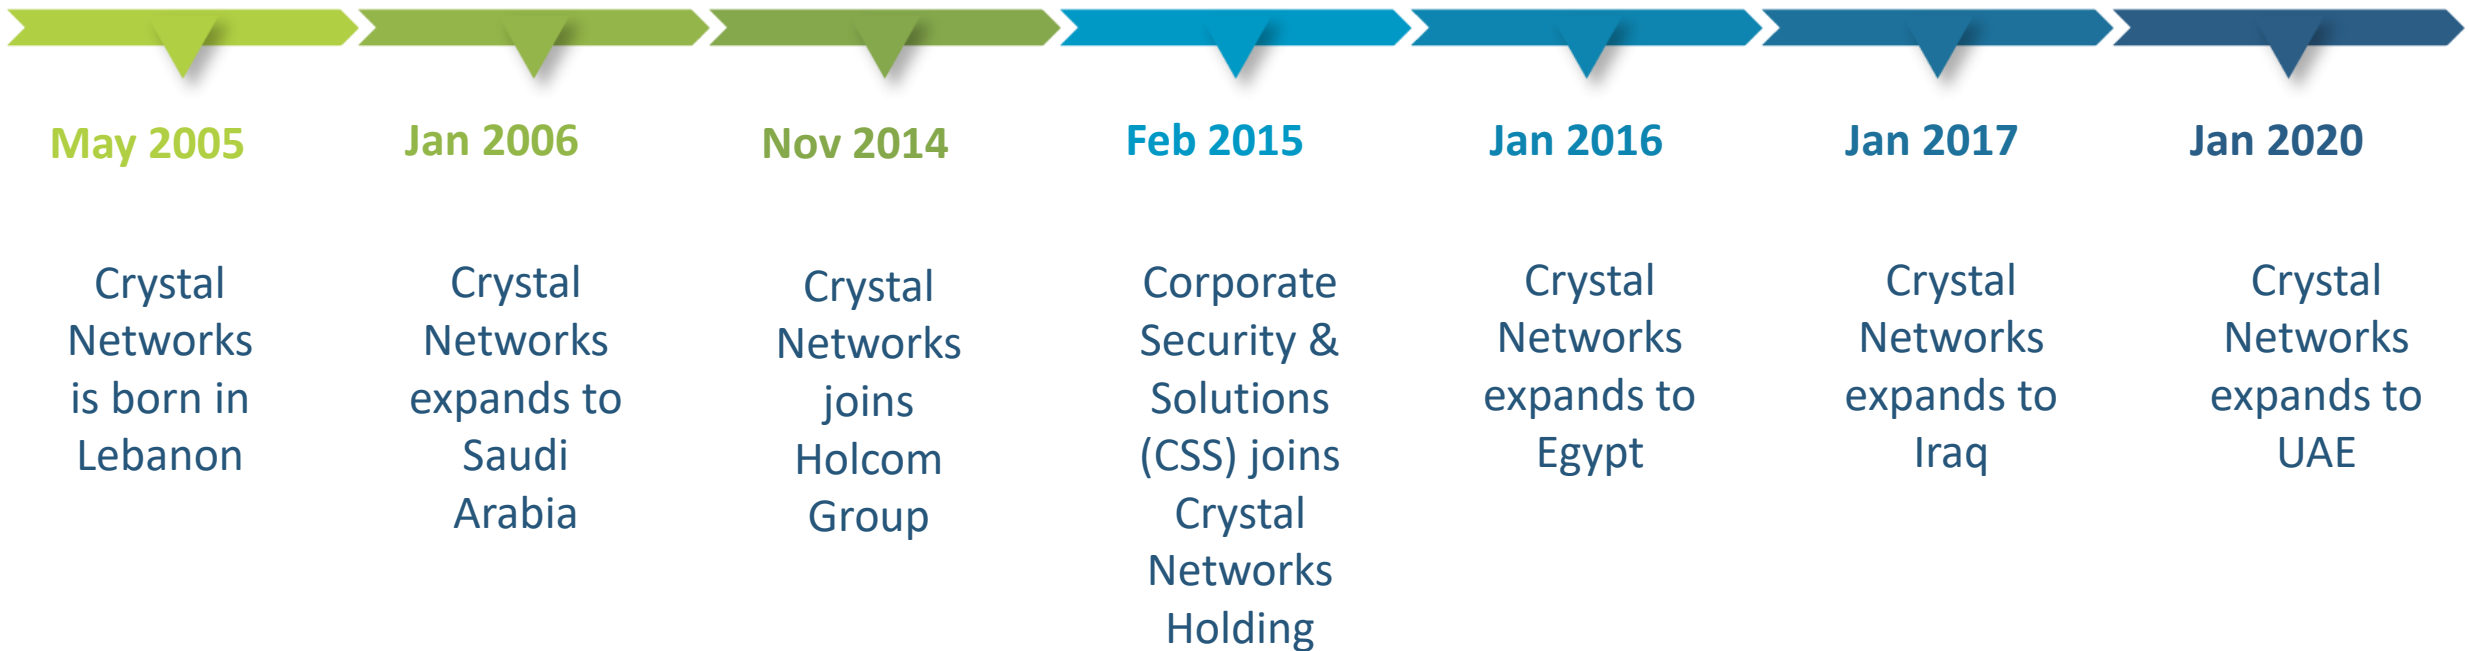

CRYSTAL NETWORKS PRESENCE

OUR TIMELINE

Today we are a proud team
of more than 256 professionals!

OUR PARTNERS

Over the years, Crystal Networks Holding has built strong strategic partnerships with world-class companies allowing us to consistently stay true to our mission of offering advanced and reliable services and solutions

OUR PARTNERS

Partners

CISCO GOLD PARTNER

CISCO

Gold
Partner

Crystal Networks is a proud
Cisco Gold Partner specialized in:

- ▼ Advanced Collaboration Architecture Specialization
- ▼ Advanced Data Center Architecture Specialization

- ▼ Advanced Security Architecture Specialization
- ▼ Express Specialization
- ▼ Authorized Technology Provider (ATP) (UCCE)
- ▼ Fire Jumper Security MSSP
- ▼ Cisco black belt masters
- ▼ Official Service arm across Africa and the Middle East region

SPLUNK PARTNERS

▼ Data Spelunking

Splunk is essentially a platform that transforms machine raw data logs into visual useful colorful dashboards. It looks into your data and gives intelligence out of the data. Real time insights. Making machine data accessible, usable and valuable to everyone

▼ Splunk is being used for data volumes ranging from gigabytes to hundreds of terabytes per day

- Gain real-time insights and a unified view across critical industrial systems and assets
- Improve operational efficiency through reduced downtime and increased availability
- Quickly diagnose costly operational issues by correlating data from across operational technology
- Move from reactive to proactive in your operations by detecting patterns, trends and anomalies

F5 PARTNERS

▼ Application Performance

- Increase availability and performance of your apps to optimize user experience

▼ Application Security

- Mitigate today's advanced threats and continue moving your business forward
- Online Fraud Prevention: Protect against fraud while keeping apps available for legitimate users

▼ Applications Access & Authorization

- Prevent unauthorized access to your networks, applications, and APIs

▼ Network Security: Keep your network secure and performant, even as network threats evolve

DELL TECHNOLOGIES GOLD PARTNER

DELL Technologies
GOLD PARTNER

- ▼ Modern Data Center Consolidation
- ▼ Data Storage
- ▼ Advanced Data Protection and Availability
- ▼ Workforce Solutions

VALIMAIL PARTNERS

VALIMAIL
TRUST YOUR EMAIL

- ▼ DMARC is the gold standard for email authentication, and 2022 is the year to roll it out
According to Gartner, adding DMARC is one of the top 10 activities security professionals should pursue
- See when malicious senders are abusing your emailing domains globally
- Control shadow IT by exposing non-authorized cloud sending services
- Take a critical first step towards protecting against spoofing and impersonation
- Experience no risk of affecting or interrupting your email flow in any way
- ValiMail has the solution to get you to the finish line to Enforcement with our patented technology and our experts will coach you to the finish line. So you can hit the ground running protecting your company's domains

ONE IDENTITY PARTNERS

▼ Privileged Access Management

- Mitigate security risks and enable compliance
- Secure, control, monitor, analyze and govern privileged access across multiple environments and platforms. Complete flexibility to provide the full credential when necessary or limit access to Zero Trust and least-privileged operating models

▼ Identity and Access Management

- Protect your organization by securing and centralizing your applications, devices, and end-users all-in-one place

▼ Energizing Work

- Employee experience is everything. Understand what your employees need, what works for them and why it works through IT that delights. Improve Security Outcomes by Improving Security Operations

▼ No matter when or where they're working, today's employees expect a great technology experience

- What's the key to making it happen?
 - Having a deep, continuous understanding of each employee's needs across the entire digital enterprise

OUR SOLUTIONS

- ▼ We take pride in having the right qualified people to implement our solutions. On top of traditional services, we have the needed expertise to offer audit and assessment services
- ▼ Design, Implementation & Integration
- ▼ Security Audit & Assessment
- ▼ Network Architecture Audit

OUR MANAGED SERVICES

As budgets tighten, some companies opt for managed services to reduce their operation cost and overcome staff limitations. Managed services are part of our services portfolio with focus on the below:

- ▼ Security as a Service
- ▼ Managed IT Services
- ▼ IT Operation
- ▼ Managed Cloud Services
- ▼ Unified Communications as a Service
- ▼ Contact Centre as a Service
